How Medical Images Can Win Legal Cases

Medical images can be used to win legal cases in a variety of ways. They can:

- **Provide objective evidence of injuries.** Medical images can show the extent of injuries, even when they are not visible to the naked eye. This can be critical in cases where the defendant is disputing the severity of the injuries.
- **Help to establish causation.** Medical images can help to show how an injury was caused. This can be important in cases where the defendant is claiming that the injury was not caused by the accident or incident in question.
- **Quantify damages.** Medical images can be used to calculate the cost of medical treatment and other expenses. This can help to ensure that the victim is fully compensated for their injuries.

In short, medical images can be a powerful tool in personal injury law. They can help to prove liability, establish damages, and win cases.
