If so, then you need to read "Stocks That Return 100 To And How To Find Them." This book will teach you the secrets of finding stocks that have the potential to return 100% or more.

The author, Peter Lynch, is one of the most successful investors of all time. He managed the Fidelity Magellan Fund for 13 years, during which time he averaged a return of 29% per year. That's more than double the return of the S&P 500 index.

In "Stocks That Return 100 To And How To Find Them," Lynch shares his secrets for finding these hidden gems. He teaches you how to identify companies with strong fundamentals, how to spot undervalued stocks, and how to time your investments.

This book is a must-read for any investor who wants to learn how to find stocks that can return 100% or more. With Lynch as your guide, you'll be able to uncover these hidden gems and achieve your financial goals.

Here's a preview of what you'll learn in "Stocks That Return 100 To And How To Find Them":

- How to identify companies with strong fundamentals
- How to spot undervalued stocks
- How to time your investments
- How to avoid common investing mistakes
- How to build a diversified portfolio of stocks that can return 100% or more

Return of a stock

fervent

$$r_j = \frac{P_{t+1} - P_t}{P_t} \equiv \frac{P_{t+1}}{P_t} - 1$$

Where:

r_j = Return on a stock j

P_t = Price of the stock at time t

P_{t+1} = Price of the stock at time $t+1$
